\*\*\*

Greetings in the Saturn-day ... The Celeste day of the Mother ... the Violet day of Saint Germain ... the day of Old Wisdom ...

And How far is Orion Constellation? ... I include a paper in the Bibliography of Why Einstein Theory is Wrong ... related to a new Calculation ...

However, each one of the Three Stars ... have (according to Modern Astronomy) a different distance to us ... in ly ... Light-year ...

-

**Alnitak**, is the first ... and is far ... 1,260 ly

-

**Alnilam**, the Central is as far as ... 2,000 ly

## What is the Maximal Speed in the Universe? ... by Dr. Giovanni A. Orlando

**Mintaka** is the Latest or the first from the right hand ... and is 1,200 ly

These are the Three Stars ...

Now ... This is what say ... Modern Astronomy and Einstein Theory that consider the measure ... "ly" or Light-Years.

The measure ly ... means ...

**If You travel that direction ... at the Speed of light ... because the Speed of Light is constant ... you will take ...  
2,000 Years at 300,000 Km/s ... (I repeat ... 2,000 years ... Absurd!)**

This is "Absurd" ... No one will embark ... in a Interplanetary Travel ... or Trek ... for 2,000

years ... No one is so Stupid.

Again ... forget the "Stupid" sense of Interstellar ... or my Favorite Saturn-day movie ...

## ***The Fifth Element***

where people must sleep because the travel is so far ... Absurd!

Let us proceed ... While ... the answer ... "What is the Maximal Speed ... will not be supplied" ... because is not free.

When I was a teenager in Caracas ... about 14 years old ... 15 years old ...

Was "normal" to go to a Park ... a Watch a Movie ... in Public.

Very frequently the offer the movie ...
